In response to Applicant's arguments the following restriction requirement is made:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-22, drawn to a process of making a screen, classified in class 29, subclass ~~896.62~~ ^{525.01}.
- II. Claims 23-44, drawn to a screen, classified in class 210, subclass 498.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process can be used to make a different product, e.g. can be used to make a screen without a plurality of sorting apertures and could make a screen only with fastening openings.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Rolf Neal in December 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant's arguments have been considered but not convincing as it does not matter how the screen of Group II is made. It can be made by processes other than Group I.
